Commission Comment: For a complete history of the authority of the Division of Environmental Quality (DEQ), see the commission comment to NMIAC chapter 65-10.

Executive Order No. 2013-24, promulgated at 35 Com. Reg. 34596 (Nov. 28, 2013), established a new Bureau of Environmental and Coastal Quality. This Order reorganized the Division of Environmental Quality as a division of the Bureau of Environmental and Coastal Quality, and provided that “all rules, orders, contracts, and agreements relating to the assigned functions lawfully adopted prior to the effective date of this Executive Order shall continue to be effective until revised, amended, repealed or terminated.”

In April 2016, pursuant to § 65-100-020, all rules and regulations in this chapter were superseded by new rules and regulations as proposed at 38 Com. Reg. 37613 (Feb. 28, 2016) and adopted at 38 Com. Reg. 37908 (Apr. 28, 2016). The Commission numbered and renumbered sections and subsections throughout this chapter pursuant to 1 CMC § 3806(a).

Part 001 - General Provisions

§ 65-100-001 Authority

(a) The regulations in this chapter have been promulgated by the Bureau of Environmental and Coastal Quality in accordance with the Commonwealth of the Northern Mariana Islands Public Law 3-23, the Commonwealth Environmental Protection Act, 2 CMC §§ 3101–3134. The regulations in this chapter and technical provisions shall have the force and effect of law and shall be binding on all persons and other legal entities subject to the jurisdiction of the Commonwealth of the Northern Mariana Islands.

(b) The Bureau of Environmental and Coastal Quality (BECQ) shall serve as the official representative for all purposes of Subtitle I of the Resource Conservation and Recovery Act of 1976, 42 U.S.C. §§ 6901–6992k (Public Law 94-580) as amended, and for the purpose of such other federal or local legislation as may hereafter be enacted to assist in the management of underground storage tanks in the Commonwealth of the Northern Mariana Islands.

Modified, 1 CMC § 3806(a), (g).

History: Amdts Adopted 38 Com. Reg. 37908 (Apr. 28, 2016); Amdts Proposed 38 Com. Reg. 37613 (Feb. 28, 2016); Amdts Adopted 14 Com. Reg. 9674 (Sept. 15, 1992); Amdts Proposed 14 Com. Reg. 9483 (July 15, 1992); Adopted 13 Com. Reg. 8281 (Nov. 15, 1991); Proposed 13 Com. Reg. 7870 (Sept. 15, 1991).

Commission Comment: The Commission numbered the paragraphs as subsections (a) and (b) pursuant to 1 CMC § 3806(a). The Commission changed “2 CMC §§ 3101 to 3134” in subsection (a) to “2 CMC §§ 3101–3134” and “42 USC §§ 6901 to 6992K” in subsection (b) to “42 USC §§ 6901–6992k” pursuant to 1 CMC § 3806(g). While this section references Public Law 94-580, Subtitle I of the Resource Conservation and Recovery Act of 1976 was added by Public Law 98-616 on November 8, 1984.

§ 65-100-005 Purpose

(a) The purpose of the regulations in this chapter is to establish a system of control and enforcement over the permitting, installation, compliance, use and monitoring of all underground storage tanks (USTs) containing regulated substances and prohibit the storage of hazardous substances or wastes in UST systems by persons within the CNMI as necessary to

conserve the land and water resources of the CNMI, protect public health, and prevent environmental pollution, resource degradation and public nuisances.

(b) The regulations in this chapter provide a means to protect the CNMI surface and groundwater resources, as stated in the Commonwealth Groundwater Management and Protection Act of 1988, 2 CMC §§ 3311–3333 (PL 6-12). Since the CNMI is dependent on groundwater for its drinking water supply, this chapter establishes a mechanism to protect this limited resource from contamination from petroleum products contained in underground storage tanks. Thus, the purpose of this chapter is to also establish leak detection, leak prevention, financial responsibility, and corrective action requirements for all UST containing regulated substances.

(c) The regulations in this chapter provide a means to protect marine resources and coastal areas under the Coastal Resources Management (CRM) Act, 2 CMC §§ 1501–1543 (PL 3-47). These UST regulations provide a mechanism to prevent the degradation or pollution of, or damage to the marine resources of the CNMI from underground storage tanks. The provisions stated in this chapter are consistent with the purpose and objective of the CRM Act.

(d) The Bureau of Environmental and Coastal Quality shall have primary jurisdiction to enforce this chapter in the CNMI. Additionally, the Environmental Protection Agency (EPA) Region IX Office, may independently enforce the regulations in this chapter without requiring BECQ action.

Modified, 1 CMC § 3806(a), (g).

History: Amdts Adopted 38 Com. Reg. 37908 (Apr. 28, 2016); Amdts Proposed 38 Com. Reg. 37613 (Feb. 28, 2016); Amdts Adopted 14 Com. Reg. 9674 (Sept. 15, 1992); Amdts Proposed 14 Com. Reg. 9483 (July 15, 1992); Adopted 13 Com. Reg. 8281 (Nov. 15, 1991); Proposed 13 Com. Reg. 7870 (Sept. 15, 1991).

Commission Comment: The Commission changed “2 CMC §§ 3111 to 3133” in subsection (b) to “2 CMC §§ 3101–3134” and “2 CMC §§ 1501 to 1543” in subsection (c) to “2 CMC §§ 1501–1543” pursuant to 1 CMC § 3806(g).

§ 65-100-010 Administration

(a) The Administrator is authorized to take such action as may be necessary in the administration and enforcement of the Underground Storage Tank Regulations for the CNMI.

(b) The Bureau of Environmental and Coastal Quality shall be responsible to prepare, adopt, promulgate, modify, update, repeal, and enforce rules and regulations governing underground storage tank design, construction, permitting, installation, release detection and inventory control, compatibility, record maintenance, reporting, corrective action, closure, and financial responsibility in order to protect human health and environment, and enable BECQ to carry out the purposes and provisions of this chapter.

§ 65-100-310 Underground Storage Tank Location Requirements

- (a) Island of Saipan – Groundwater Management Zones (From Part 2000 of the CNMI Well Drilling and Well Operations Regulations, NMIAC, Title 65, Chapter 140).
- (1) Island of Saipan Class I and Class II Groundwater Management Zone UST System Restrictions: No new USTs shall be permitted for installation or operation in Saipan’s Class I or Class II Groundwater Management Zones.
- (2) Island of Saipan Class III Groundwater Management Zone Restrictions. Minimum downgradient and upgradient UST system setback requirements from existing public and private drinking water wells for new USTs:
- (i) Boundary of UST facility. Wellhead setback requirement:

- (A) Upgradient 500 feet.
 - (B) Downgradient 500 feet.
 - (ii) Downgradient and upgradient UST system facility setback requirements for seawater wells and wells undergoing reverse osmosis treatment may be reduced as allowed under § 65-140-1105 and § 65-140-1205 of the CNMI Well Drilling and Well Operations Regulations.
 - (3) There shall be no tanks installed in the following locations:
 - (i) Within a wetland or within 500 feet of a wetland boundary;
 - (ii) Within 500 feet of surface water bodies, such as a reservoir, spring, or cave, from which public drinking water supply is collected;
 - (iii) Within 500 feet of inland waters;
 - (iv) Within 500 feet of the shoreline (as measured from the mean high water mark) or navigable waters;
 - (v) Within tidal or storm water inundation areas; or
 - (vi) Any area determined as unsuitable by the Administrator of BECQ.
 - (4) The Administrator of BECQ may, on a site specific basis, waive the requirements of (a)(1)–(3) for the replacement of an existing permitted UST if it can be demonstrated to the Administrator’s satisfaction that such a waiver will not adversely impact human health or the environment. An application for such a waiver must be supported in writing by the owner or operator with the following information:
 - (i) The particular conditions which make compliance with (a)(1)–(3) unfeasible for a facility with an existing permitted UST (e.g., why an aboveground storage tank would not be an acceptable substitute for a UST).
 - (ii) With the exception of (a)(4), the project design shall fully meet all the requirements of this section, and provide additional measures for leak prevention and leak detection to ensure adequate protection of those locations listed in (b)(1)–(3). Such measures may include but are not limited to: UST system design (e.g., double-walled, non-corrodible tanks and piping) or additional compliance monitoring (e.g., weekly or daily versus monthly leak detection check).
 - (iii) When granting a waiver to the requirements in (a)(1)–(3), the Administrator of BECQ may impose additional conditions necessary to assure adequate protection of human health and the environment.
- (b) Islands of Tinian and Rota – CNMI Groundwater Recharge Zones.
- (1) Until such time as the DEQ promulgates groundwater management zones for the islands of Tinian and Rota, the existing groundwater recharge zone categories (primary, secondary, and brackish) as defined in CNMI Water Quality Standards 2014 (NMIAC, Title 65, Chapter 130) shall be used to determine acceptable locations for placement of new USTs.
 - (2) To determine the groundwater recharge zone in the location of the proposed UST placement, the applicant must prove a determination of the underlying geology, aquifer characteristics, groundwater quality, location and proximity of all nearby wells, and current and potential future use of the underlying groundwater for public water supply based on a review of available information including United States Geological Survey (USGS) maps and reports, Commonwealth Utility Corporation (CUC) well field maps, and nearby well drilling records. DEQ may assist the applicant in making such determination where sufficient information exists. The applicant may provide a determination on the basis of a professional hydrogeologist.

(3) Primary Groundwater Recharge Zone. No new USTs shall be permitted for installation or operation in areas determined to meet one or more of the following primary groundwater recharge zone criteria:

(i) Areas contributing surface infiltration to a geologic formation that is saturated with fresh groundwater that is not in contact with seawater (i.e., “perched” groundwater) and is capable of transmitting quantities of fresh water in sufficient quantity to sustain a public water supply well;

(ii) Areas that can reasonably be considered, on the basis of maps provided by USGS or CUC, to be within active or future public water supply well fields;

(iii) Areas contributing surface infiltration to a geologic formation that discharges to a known spring or stream that currently is or is capable of transmitting quantities of fresh water in sufficient quantity to be used as a public water supply.

(4) Secondary Groundwater Recharge Zone.

(i) No new USTs shall be permitted for installation or operation in areas determined to meet the secondary groundwater recharge zone criteria.

(ii) Secondary groundwater recharge zones are defined as areas designated as contributing surface infiltration to a geologic formation that is saturated with groundwater less than 500 parts per million total dissolved solids, and currently or are capable of transmitting quantities of water in sufficient quantities to sustain a public water supply well; or areas with groundwater surface elevation equal to or greater than one foot as mapped by the USGS.

(5) Brackish Groundwater Recharge Zone.

(i) New USTs may be installed and operated in areas which are determined to meet the brackish groundwater recharge zone criteria provided.

(ii) Brackish groundwater recharge zones are defined as areas contributing surface water infiltration to a geologic formation that is saturated with greater than 500 parts per million total dissolved solids; or areas with groundwater surface elevation less than one foot as mapped by USGS.

(6) New USTs must meet the following wellhead setbacks:

(i) Minimum downgradient and upgradient UST system setback requirements from existing public and private drinking water wells.

(ii) Boundary of UST facility. Wellhead setback requirement:

(A) Upgradient 500 feet

(B) Downgradient 500 feet

(iii) Downgradient and upgradient UST system facility setback requirements for seawater wells and wells undergoing reverse osmosis treatment may be reduced as allowed under § 65-140-1105 and § 65-140-1205 of the CNMI Well Drilling and Well Operations Regulations.

(7) No UST systems shall be installed in the following locations:

(i) Within a wetland or within 500 feet of a wetland boundary;

(ii) Within 500 feet of surface water bodies, such as a reservoir or cave, from which public drinking water supply is collected;

(iii) Within 500 feet of inland waters;

(iv) Within 500 feet of the shoreline (as measured from the mean high water mark);

(v) Within tidal or storm water inundation areas; or

(vi) Any areas as determined unsuitable by the Administrator of BECQ.

(8) The Administrator of BECQ may, on a site specific basis, waive the requirements of (b)(1)–(7) for the replacement of existing permitted USTs if it can be demonstrated to the Director’s satisfaction that such a waiver will not adversely impact human health or the environment. An application for such a waiver must be supported in writing by the owner or operator with the following information:

(i) The particular conditions which make compliance with (b)(1)–(7) unfeasible for a facility with an existing permitted UST (e.g., why an aboveground storage tank would not be an acceptable substitute for a UST).

(ii) With the exception of (b)(8), project design shall fully meet all the requirements of this section, and provide additional measures for leak prevention and leak detection to ensure adequate protection for those locations listed in (b)(1)–(7). Such measures may include but are not limited to: UST system design (e.g., double-walled, non-corrodible tanks and piping) or additional compliance monitoring (e.g., weekly or daily versus monthly leak detection check).

(iii) When granting a waiver to the requirements in (b)(1)–(7), the Administrator of BECQ may impose additional conditions necessary to assure adequate protection of human health and the environment.

Commission Comment: The Commission numbered this section, and renumbered subsequent sections in Part 300 pursuant to 1 CMC § 3806(a). The Commission substituted “(a)(1)–(3)” for “this section, Part 4 (B)(5)(a)(1-3)” in (a)(4), (a)(4)(i), and (a)(4)(iii); “(a)(4)” for “this section, Part 4 (B)(5)” in (a)(4)(ii); “section” for “subchapter” in (a)(4)(ii) and (b)(8)(ii); “(b)(1)–(7)” for “this section, Part 4 (B)(5)(a)(1)-(3)” in (b)(8), (b)(8)(i), and (b)(8)(iii); and “(b)(8)” for “this section, Part 4 (B)(5)” in (b)(8)(ii) pursuant to 1 CMC § 3806(d), (g).

§ 65-100-315 Permit

(a) Upon approval of an application for a permit to install the owner or operator shall have six months from the issuance of the permit to install a UST system. If the installation is not completed within six months, the permit expires and the owner or operator must apply for a new permit.

(b) A permit to operate may be issued by the Administrator for a period of one year.

(c) The BECQ, where practicable and appropriate, may issue one permit to the owner or operator of a UST system for the purpose of combining all USTs, piping, and any ancillary equipment constituting that UST system under one permit, irrespective of the number of individual USTs, so long as that UST system is part of one reasonably physical location.

(d) BECQ shall inspect and approve all installation procedures and verify that all federal and local specifications have been met and followed.

(e) All ports, vents, or other apparatuses that could in anyway be construed as a fill port must be:

(1) properly identified by labeling which is easily visible and

- (2) locked to prevent accidental spills due to human error.
- (f) There will be a twenty-one day processing period for any permit to be issued, from the time all requirements in this chapter have been completed and BECQ determines the application complete.
- (g) All BECQ UST permits shall be kept at the UST site and be readily available at all times for inspection by the Administrator or BECQ UST inspector.
- (h) The Administrator may set permitting fees as appropriate. Fees shall be specified in writing and published in the Commonwealth Register.
