#### INSTRUCTIONS AND GENERAL INFORMATION

Please **type or print in ink**. Also, be sure you have signatures in ink for sections VIII and XI. Complete a notification form for each location containing underground storage tanks. If more than 5 tanks are owned at this location, you may photocopy pages 3 through 6 and use them for additional tanks.

The primary purpose of this notification form is to provide information about the installation, existence, changes to, and closure of underground storage tank systems (USTs) that store or have stored petroleum or hazardous substances. The information you provide will be based on reasonably available records, or in the absence of such records, your knowledge or recollection.

**Federal law requires UST owners to use this notification form for all USTs storing regulated substances that are brought into use after May 8, 1986, or USTs in the ground as of May 8, 1986 that have stored regulated substances at any time since January 1, 1974. The information requested is required by Section 9002 of the Solid Waste Disposal Act (SWDA), as amended.**

**Who Must Notify?** 40 CFR part 280, as amended, requires owners of USTs that store regulated substances (unless exempted) to notify implementing agencies of the existence of their USTs. Owner is defined as:

- In the case of an UST in use on November 8, 1984, or brought into use after that date, any person who owns an UST used for storage, use, or dispensing of regulated substances; or
- In the case of an UST in use before November 8, 1984, but no longer in use on that date, any person who owned the UST immediately before its discontinuation.

Also, owners of previously deferred UST systems with field-constructed tanks and airport hydrant fuel distribution systems in the ground as of October 13, 2015 must submit a one-time notification of existence by October 13, 2018. Owners of UST systems with field-constructed tanks and airport hydrant fuel distribution systems brought into use after October 13, 2015 are considered new facilities and must follow the same notification requirements as all other UST owners.

**What USTs Are Included?** An UST system is defined as any one or combination of tanks that is used to contain an accumulation of regulated substances, and whose volume (including connected underground piping) is 10 percent or more beneath the ground. Regulated USTs store petroleum or hazardous substances (see **What Substances Are Covered** below). This includes UST systems with field-constructed tanks and airport hydrant fuel distribution systems.

- What Tanks Are Excluded From Notification (see § 280.10 and § 280.12)?**
- Tanks removed from the ground before May 8, 1986;
  - Farm or residential tanks of 1,100 gallons or less capacity storing motor fuel for noncommercial purposes;
  - Tanks storing heating oil for use on the premises where stored;
  - Septic tanks;
  - Certain pipeline facilities regulated under chapters 601 and 603 of Title 49;
  - Surface impoundments, pits, ponds, or lagoons;
  - Storm water or wastewater collection systems;
  - Flow-through process tanks;
  - Liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
  - Tanks on or above the floor of underground areas, such as basements or tunnels;
  - Tanks with a capacity of 110 gallons or less;
  - Wastewater treatment tank systems;
  - UST systems containing radioactive material that are regulated under the Atomic Energy Act of 1954;
  - UST systems that are part of an emergency generator system at nuclear power generation facilities regulated by the Nuclear Regulatory Commission under 10 CFR part 50.

**What Substances Are Covered?** The notification requirements apply to USTs containing petroleum or certain hazardous substances. Petroleum includes gasoline, used oil, diesel fuel, crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute). Hazardous substances are those found in Section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, with the exception of those substances regulated as hazardous waste under Subtitle C of the Resource Conservation and Recovery Act.

**When And Who To Notify?** Owners who bring USTs into use after May 8, 1986 must submit this notification form to the implementing agency within 30 days of bringing the UST into use. If the implementing agency requires notification of any amendments to the facility, send information to the implementing agency immediately.

**Penalties:** Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed \$16,000 for each tank for which notification is not given or for which false information is given.
